- Improved Transportation:** Efficient transport systems make commutes easier, encouraging people to settle in urban areas.

Effects of Urbanization:

- Population Growth:** The population has surged from approximately 2 million in the 1950s to over 7 million today, straining infrastructure.
- Traffic Congestion:** Increased vehicles lead to longer commute times and pollution. For example, the MTR system, while extensive, faces overcrowding during peak hours.
- Environmental Degradation:** Urban sprawl results in loss of green spaces, increased air and water pollution, and habitat destruction.
- Housing Issues:** High demand causes soaring property prices and overcrowded living conditions, especially in Kowloon and the New Territories.
- Socio-economic Changes:** Urbanization has led to diverse communities but also widened income disparities.

Visual Support:

- A map illustrating urban expansion boundaries over decades.
